# Utility & Multipurpose Slabs

## Utility and Multipurpose Slab Range

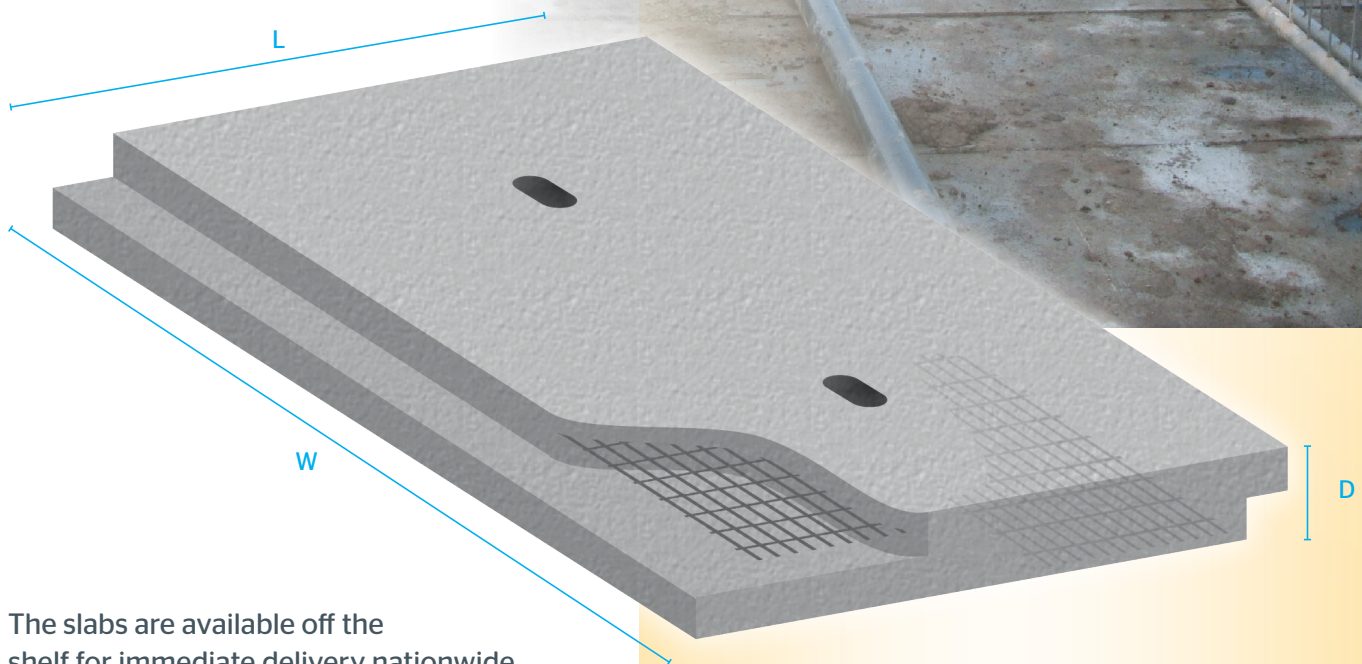

Utility and pipe protection/multipurpose slabs are engineered from 50N mm<sup>2</sup> semi-dry concrete and are heavily reinforced with steel.

Three standard sizes are available that are all reinforced with heavy duty mesh to give you more choice.

This makes them ideal for protecting utilities, such as water pipes, high pressure gas main and power cables from accidental damage and above-ground traffic.

With integral cast-in and fully certified lifting points, each face of the slab is reinforced with heavy-duty mesh that offers stakeholders peace of mind.

### Utility slab showing reinforcing mesh on both faces

The slabs are available off the shelf for immediate delivery nationwide.

Width	Length	Depth	Weight
2500mm	1000mm	150mm	900kg
3000mm	1000mm	150mm	1090kg
3500mm	1000mm	150mm	1270kg
