# Mobile Post Blocks

The mobile post blocks are suitable for permanent or temporary installation and are ideal for carrying security fencing, signage, mirrors, lights, CCTV cameras, handrails, traffic lights and safety/edge protection systems.

Available in a range of sizes to suit your project needs, from 375kg to 2400kg.

The posts themselves are simple and quick to install with no worries around Hand Arm Vibration (HAVS), damaging the concrete, no dust or noise during installation, post placement is always in the centre and once removed there are no holes to fill in.
