Silo Foundation Base Slabs

At Elite Precast, our number one priority is customer care and making client's lives easier.

This includes the introduction of precast concrete foundation base slabs that are used for siting silos.

Silo Foundation Base Slabs

Block Type	L x W x H mm	Weight
Silo Foundation Base Slab	3000 x 1000 x 150	1090kg
Silo Foundation Base Slab	3000 x 1000 x 250	1765kg

Made offsite at our Shropshire works, our team has an enviable reputation for service and technical expertise, with the factory-made silo concrete foundation base slabs, saving users time and money on site and reducing site wastage, vehicle movements and carbon output.

Note: Customers are responsible for ensuring that the slabs are suitable for use as a Silo Foundation Base Slab and should be installed in conjunction with a suitable granular base. Please take site safety into consideration. The effect of wind loading should be considered and is the responsibility of the customer.
