

**ELITE**  
PRECAST CONCRETE

# Keeping it secure with **Tank Trap Pyramid Barriers (TTPBs)**

## Applications

- Outdoor events
- Airports
- MOD premises
- Power Stations
- Vital infrastructure
- Car storage parks

## Benefits

- Simple interlocking design
- Easy to handle
- Low maintenance
- Robust and durable
- Fire Resistant
- High strength  
50N/mm<sup>2</sup> concrete
- Integral in anchor  
lifting point (s)
- Available within days  
of ordering

# Tank Trap Pyramid Barriers (TTPBs)

To give your security real strength, whether it's to prevent vehicles being stolen or possible terrorist attacks, you need the complete, cost-effective perimeter security provided by tank trap barriers.

The pyramidal 'dragon's teeth' design has been specially designed to stop any size vehicle driving over them without being impaled.

Available in one or three-pyramid modular units, each three pyramid 2500kg unit consists of three 850mm square pyramids with interlocking connectors that just slot into place, making this simple system highly secure - whatever the length of your site perimeter.

## Tank Trap Pyramid Barriers

Type	Length	Height	Width	Weight
STTPB	900mm	850mm	900mm	760kg
TTPB	2700mm	850mm	900mm	2500kg
